## DETAILED ACTION

### *Response to Amendment*

1. Acknowledgement is made of Amendment filed on 12/30/2010 pursuant to the petition granted on 02/22/2011 to revive the application abandoned unintentionally.

### *Status of Claims*

2. Claims 19-20, 22, 24-25, 28-30, 32, and 34 are currently amended. Claims 1-18,21, and 31 are cancelled while claims 37-39 are newly added.

### EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Stephen A. Burch, REG. No. 66,570 on 04/13/2011.

The application has been amended as follows: In claim 19, **replace**, "during the phase (t4-t5) of high power loss" **with** -- during the phase of high power loss --

In claim 26, **replace**, "wherein the first threshold value is approx. 15% and the second threshold value is approx. 85%" **with** -- wherein the first threshold value is approximately 15% and the second threshold value is approximately 85% --

4. In claim 30, **replace**, "wherein, depending on a triggering signal and a switching condition on the control input in the first phase, a first current value, in the second phase, a second, higher current value, and in the third phase, a third current value is fed

in, and the third current value is lower than the second current value”, **with**, -- wherein, depending on the triggering signal and the switching condition on the control input, in the first phase, a first current value is fed in, in the second phase, a second current value is fed in, and in the third phase, a third current value is fed in, and the first current value and the third current value are lower than the second current value --

5. In claim 32, **replace**, “An arrangement according to claim 31”, **with**, -- An arrangement according to claim 30 --

#### **Allowable Subject Matter**

6. The following is an examiner’s statement of reasons for allowance: Claims 19-20,22-30,32-39 are allowed.

7. Regarding claim 19, the prior art of record taken alone or in combination thereof does not teach the limitations of, “a method for triggering a load element , the method comprising controlling a voltage on the load element with a maximum specified increase; recording, during a switching procedure, an effectively occurring power loss, wherein the effective increase is controlled dependently on the recorded power loss; and wherein the triggering is achieved such that during the phase of high power loss, the voltage is adapted with the maximum specified increase, and the increase at the beginning and the end of the switching procedure is lower than the maximum increase.”

8. Claims 20,22-29, and 37-39 are also allowable for the same reasons in virtue of their direct or indirect dependencies from claim 19.

9. Regarding claim 30, the prior art of record taken alone or in combination thereof does not teach the limitations of, “a switching arrangement for triggering a load

*element, the switching arrangement comprising, inter alia, wherein, depending on the triggering signal and the switching condition on the control input, in the first phase, a first current value is fed in, in the second phase, a second current value is fed in, and in the third phase, a third current value is fed in, and the first current value and the third current value are lower than the second current value",* in combination with the remaining limitations and functionalities of claim 30.

10. Claims 32-36 are also allowable for the same reasons in virtue of their direct or indirect dependencies from claim 30.

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Citation of Prior Art***

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in the PTO-892 and not mentioned above disclose related apparatus.

12. Gergintschew US PAT 6,747,505 discloses the general state of the art regarding a circuit configuration for controlling load with reduced noise emission.

13. Konstanzer US PAT 5,479,086 discloses the general state of the art regarding a process and device for reducing the inrush current when powering an inductive load.

14. Torrisi et al., (Torrisi) US PAT 6,784,721 teaches a driver circuit for soft turning on a power element connected to an inductive load.
